DETAILED LESSON PLAN

Understanding Fractions

Teacher:	Maria Cruz	**Grade & Section:**	Grade 4 - Sampaguita
Learning Area:	Mathematics	**Term & Week:**	Term 1 - Week 3

I. Learning Competencies	Compare fractions using concrete models.
II. Learning Objectives	1. Identify halves and quarters. 2. Represent fractions using models.
III. Subject Matter	Fractions as equal parts of a whole.
IV. Learning Resources	Fraction strips, paper circles, learner worksheets, and the class textbook.
V. Classroom Activities	1. Fraction Strip Comparison (Pair work) - 15 min Compare halves and quarters using fraction strips. Explain how equal parts make a whole. Materials: Fraction strips and paper circles
VI. Procedure	1. Review equal parts using paper circles. 2. Model halves and quarters. 3. Guide pairs as they compare fraction strips.
VII. Assessment	Draw and label one half and one quarter. Explain which represents the larger part.
VIII. Assignment	Find one example of fractions at home and draw it in your notebook.
IX. Reflection	Learners used concrete models to explain their comparisons.
X. Additional Notes	Provide larger paper models for learners who need additional support.
